London, UK

SUMMARY

- Experienced software professional with 14+ years in the tech industry.
- Skilled in back-end development, complemented by solid familiarity with front-end technologies.
- Proficient in designing and implementing reliable & scalable systems in Cloud Native environments.

SKILLS

- **Programming Languages**: Go, Python, Rust, TypeScript.
- **Databases**: PostgreSQL, SQLite, Clickhouse, Neo4j, DynamoDB, Redis.
- **Cloud Native Environments**: GCP (Google Cloud Platform), AWS (Amazon Web Service), Azure, Kubernetes, Docker, Terraform.
- **Message Queues**: Apache Kafka, RabbitMQ, AWS SQS (Simple Queue Services).
- **Web Frameworks**: FastAPI, Flask, Django, React.js.

EXPERIENCE

Senior Software Engineer @ Neo4j (London, UK) — Mar 2026 – Present

- As a member of Aura - IAM team, I work on a comprehensive system to provide seamless authentication & authorization across Neo4j's Cloud Native Graph Database products.
- Skills: Identity & Access Management, Authentication, Authorization, SSO, Go, Python (Flask), GCP, AWS, Azure, Kubernetes, Graph Database, NoSQL.

Senior Software Engineer @ Encord (London, UK) — Apr 2024 – Mar 2026 (2yr)

- Led initiatives to offer enterprise-level features for our AI Data Management Platform: authentication, authorization, user lifecycle management, workspaces, and SSO. Also smoothly onboarded enterprise customers with higher ACV and contributed to overall ARR increment.
- Drove technical proposals, discussions, and implementation for a hybrid IAM solution that works across both SaaS and on-premise/dedicated VPC offerings of the Platform.
- Championed engineering culture and process improvements: RFCs and technical proposals, release process, and other standardizations.
- Skills: Identity & Access Management, Authentication, Authorization, SSO, Python (FastAPI), PostgreSQL, SQLAlchemy, GCP, Kubernetes, RabbitMQ, TypeScript, React.js.

Senior Software Engineer @ Orca Security (London, UK) — June 2023 – Feb 2024 (9mo)

- Contributed to building solutions based on Graph Database (using Apache TinkerPop & Gremlin) as part of Context Analysis team, which is a foundational building block for Cloud Security Analysis.
- Skills: Python (Django), AWS, Kubernetes, PostgreSQL, AWS Neptune & Apache TinkerPop.

Senior Software Engineer @ Onfido (London, UK) — Aug 2020 – June 2023 (2yr 11mo)

- Collaborated on various backend services to tackle fraud analysis, detection, and prevention at a large scale, handling tens of millions of end-user records monthly. Involved in designing data pipelines, event-driven architecture, and system scaling and monitoring.

- Played a key role in enhancing the image and video capture experience and quality for the Onfido Web SDK. This improvement led to a 5-10% reduction in drop-off rates and a 10-30% increase in pass rates.
- Skills: Python (Flask), Ruby on Rails, Elixir, AWS, Kubernetes, PostgreSQL, React.js & TypeScript.

Senior Software Engineer @ Pi-top Remote — Sep 2019 – Jul 2020 (11mo)

- Developed new features in both backend and frontend (using React & Redux) for Further, a learning-by-making platform on top of Raspberry Pi hardware devices.
- Collaborated with stakeholders to clarify requirements from thousands of teachers and students in North America and Europe, contributing to the improvement of project structure, performance, and team work process.
- Skills: Python, TypeScript (Loopback.js), GCP, Kubernetes, MongoDB, React.js & GraphQL.

Senior Software Engineer @ WeFit (Hanoi, Vietnam) — Aug 2016 – Aug 2019 (3yr)

- Led the architecture and design of the WeFit mobile application, an online-to-offline platform connecting users with local fitness studios. Successfully served over 200,000 users with 2000+ daily active users.
- Developed robust web-based tools to efficiently manage a high volume of user bookings and revenues, supporting 10,000+ bookings and working with 300+ fitness partners on a monthly basis.
- Skills: TypeScript, Ruby on Rails, Python, PostgreSQL, React.js, Next.js & React Native.

Dev Lead @ TOPICA Edtech Group (Hanoi, Vietnam) — Aug 2014 – Aug 2016 (2yr 1mo)

- Oversaw the Operations department of 30 members, facilitating seamless collaboration between 200+ instructors to curate and deliver 500+ video courses on Edumall, a prominent short-course learning platform.
- Spearheaded a talented development team of 10 individuals, successfully delivering and launching Web, iOS, and Android applications for Memo, an innovative English learning product. Empowered over 150,000 users, achieving a daily active user base of 3000+.
- Skills: Ruby on Rails, MongoDB, Objective-C, Swift.

Mobile Developer @ Vinova Pte. Ltd. (Hanoi, Vietnam) — Aug 2012 – Sep 2014 (2yr 2mo)

- Successfully led a team of 3 in the development of 5 diverse mobile applications catering to the Singapore marketplace.
- Demonstrated expertise in providing valuable technical guidance to customers, facilitating optimal technology selections, and taking proactive measures to maintain and upgrade products.
- Skills: Objective-C, C++, iOS.

Undergrad @ Vietnam National University, Hanoi — Aug 2009 – May 2013 (3yr 10mo)

- Bachelor's Degree, Computer Science.

PORTFOLIO

- **ethanify.me**: Personal home page.
- **xkpasswd.github.io**: XKCD password generator, written in Rust with supports for Wasm.
- **github.com/ethan605/aws-vpn-client**: AWS VPN Client, written in Go.
